

## Results

- Reduced costs by removing the need for manually processing invoices into Prime Ecosystem.
- Reduced the time taken to process invoices and improved accuracy.
- Achieve greater visibility and control over AP process.

EzeScan automatically detects values such as invoice number, invoice date, work order number, amount, and more from the invoices, and validates them against Prime Ecosystem's database.

Multiple exception rules can be applied, such as invalid supplier or ABN, invalid or no work order number, duplicate invoice, and more. Exceptions are automatically flagged and validated in EzeScan Webapps browser interface.

EzeScan CLOUD's Prime Ecosystem accounts payable solution is available as a SaaS offering, providing fast deployment with an affordable monthly subscription, without the software, hardware, or management headaches. EzeScan provides 'out of the box' native integration with Prime Ecosystem, with a highly configurable interface, providing rapid deployment measured in days, eliminating the need for expensive and time-consuming custom scripting or programming services.

The integration of EzeScan CLOUD AP Invoice Automation has led to several benefits for RPF Building. Firstly, it has reduced the time taken to process invoices, enabling the AP department to process a higher volume of invoices in a shorter period. This has also led to improved accuracy and reduced errors, resulting in fewer discrepancies and disputes.

Secondly, the solution has enabled RPF Building to achieve greater visibility and control over the AP process. The automation of the workflow has made it easier to track the status of invoices, identify bottlenecks, and monitor the performance of the AP team.

Thirdly, the integration has enabled RPF Building to save costs associated with manual processing. The automation of the workflow has reduced the need for manual intervention, resulting in significant cost savings for the organisation.

In conclusion, RPF Building's successful integration of EzeScan CLOUD AP Invoice Automation for their Prime Ecosystem has resulted in significant improvements in the efficiency of their AP department. The solution has enabled the organisation to process invoices more quickly, with greater accuracy, and at a lower cost. As a result, RPF Building is better positioned to manage their finances and focus on delivering excellent customer service.

## About EzeScan

EzeScan provides fast, cost effective business process automation solutions including simplified document back scanning, accounts payable, data robotic process automation, forms data extraction, mailroom/correspondence automation and highly integrated EDRMS capture. With thousands of installations in Australasia, North America and the UK, EzeScan is your ideal digital transformation provider.
